PROFESSIONAL SUMMARY

Junior System Administrator with experience supporting web hosting, WordPress administration, Linux servers, Google Workspace, VPN access, backups, endpoint security, monitoring, and IT asset management. Skilled in automating routine checks, documenting IT processes, resolving technical issues, and improving operational visibility across systems and websites.

TECHNICAL SKILLS

System Administration: Windows Server, Linux, SSH, MobaXterm, user provisioning, permissions, server monitoring, log review, backup monitoring

Web & Cloud Administration: WordPress, cPanel, GoDaddy, Cloudflare, DNS, SSL, WPMU DEV, plugin/theme/core updates, website backups

Identity & Productivity: Google Workspace Admin Console, onboarding/offboarding, email management, Slack, Teamwork, Time Doctor

Security & Remote Access: Bitdefender, OpenVPN, Tailscale, VPN setup, secure remote access, patch management

IT Support & Tools: GLPI, IT asset management, ticket handling, incident logging, SLA support, AnyDesk, Acronis Cyber Connect

Monitoring & Business Tools: Synology Backup, UptimeRobot, performance checks, SAP, WMS, Microsoft Excel

WORK EXPERIENCE

Junior System Administrator | Primeview - Alabang, Metro Manila (WFH) | July 2025 - Present

- Administered web hosting and WordPress environments across GoDaddy, Cloudflare, WPMU DEV, and cPanel, managing DNS, SSL, access, updates, backups, and security checks to improve website stability and operational control.
- Performed Linux server support through SSH and MobaXterm, handling file management, permission fixes, log review, backup transfers, archive extraction, and command-line troubleshooting to resolve hosting and website issues faster.
- Monitored uptime, server health, backups, and website performance using UptimeRobot, Synology, and routine infrastructure checks to identify issues early and support reliable service availability.
- Developed IT monthly check automation and implemented GLPI for asset, ticket, and subscription tracking, reducing manual inspection time by approximately 90% and centralizing IT administration processes.

Technical Support Specialist (Tier 1) | Civicom Pacific Corporation - Alabang, Metro Manila | September 2024 - February 2025

- Resolved 50+ daily support tickets through phone, email, and chat, troubleshooting system, software, and access issues while maintaining an 85-90% first-contact resolution rate.
- Documented ticket activity, issue details, troubleshooting steps, and resolutions in support systems to improve case tracking and maintain accurate service records.
- Configured user accounts, devices, and system access for onboarding requests, helping new users gain required tools and permissions with minimal delay.
- Escalated complex incidents to higher-level teams with complete case notes and initial diagnostics, reducing repeat questions and supporting faster issue resolution.

Data Management Specialist | Civicom Pacific Corporation - Alabang, Metro Manila | April 2024 - June 2024

- Maintained business datasets and performed data validation checks to protect data integrity and support 99%+ accuracy in daily records.
- Improved data processing workflows using Microsoft Excel tools, increasing processing efficiency by approximately 20%.
- Managed data access, updates, and validation across teams to keep shared records consistent and available for operational use.
- Reviewed and corrected data discrepancies before submission, reducing rework and improving the reliability of team reporting outputs.

Data Entry Operator | Metro Mandaue Service Corporation - Cavite | August 2021 - January 2023

- Managed inventory records in SAP and WMS, updating stock movements and transaction details to maintain accurate system records.
- Performed inventory reconciliation between physical counts and system data, maintaining a discrepancy rate below 2%.
- Validated inventory entries, item details, and transaction records to ensure consistent reporting across warehouse operations.
- Coordinated with warehouse and operations teams to correct data issues, improve record accuracy, and support smoother inventory tracking.

PROJECTS & PROCESS IMPROVEMENTS

IT Monthly Check Automation Script

- Developed a Windows-based IT monthly check script to automate routine workstation and system inspections, reducing manual checking time by approximately 90% and improving consistency of monthly IT reports.

GLPI IT Management System

- Implemented GLPI to centralize IT asset tracking, support ticket monitoring, software subscription records, and administrative workflows, improving visibility of IT resources and renewal monitoring.

EDUCATION

Information Technology - Applied Computer Engineering | Imus Computer College (ICC) | August 2023 - June 2025

- Completed Computer Systems Servicing NC II coursework and hands-on training in computer systems, networking, and server setup.
